## About

Interior architect born and raised in Helsinki Finland. I Was born in the 1980's, during those times me and my friend were already drawing interior plans for our imagination houses.

I started own freelance practise KorpijärviDesign when I was still studying in Lahti University of Applied Science 2008, because I was so eager to start do my own design.

Same kind of eagernes is still in me, but now my work is driven by the principles of human, consideration and enthusiasm. At first every concept, interior design plan or what so ever is full of possibility's and imagination. It give's me such a great pleasure to loose myself in to my work.

During these year's my work has been mostly in the restaurant, retail, commercial and residential sectors. But I'm always up to new things as well, gladly my work is that I'm constantly learning new thing's and able to do new stuff.

---
